Experience

Capital One, Software Engineer, 09/23–Present | McLean, VA

- Developed important Extract, Transform, Load jobs using AWS Glue, Python, and PySpark
- Created web app features and bug fixes via AngularJS, TypeScript, and SCSS
- Researched and designed web architecture via Figma, AWS, and internal datasets and tools
- Produced mock data tooling via Yaml configs and Python and job scheduling via Airflow

UiPath, Software Engineer II, 03/21–02/23 | Bellevue, WA

- Built React, Angular, and StencilJS web components shared between products
- Delivered complex web app pages for Cloud, Kubernetes, and MSI environments
- Initiated and elevated testability via Playwright, Storybook, Cypress, and Jest
- Removed hundreds of Node.JS security vulnerabilities via cross-repo GitHub Actions

Microsoft, Software Engineer II, 08/19–03/21 | Bellevue, WA

- Decreased time to switch between iframes by 2+ seconds via caching shared data
- Eliminated 400 ms from server response time via server response streaming in C Sharp
- Removed memory leaks in React UI via resource disposal and state management optimization

Microsoft, Software Engineer Intern, 09/18–11/18 | Bellevue, WA

- Revamped the entire mobile app by introducing cross-product React Native
- Expanded serviceability via automated incident alerts and intelligent CMS remedies
- Increased accessibility of React Native, React Redux products via A11y standards

Microsoft, Software Engineer Intern, 05/18–08/18 | Bellevue, WA

- Boosted run-time performance of React Native app via buffered, organized logging
- Improved product serviceability via telemetry and network analysis monitoring
- Mechanized cross-language feature-gate creation and authentication via Gulp tasks

Fidelity Investments, Software Engineer Intern, 05/17–08/17 | Durham, NC

- Made features via AngularJS, Sass, REST API development, and SQL database queries
- Heightened integration, end-to-end, and unit testability via Chai, Mocha, and Jasmine

Virginia Tech, Computer Science TA, 08/16–05/17 | Blacksburg, VA

- Aided students' software design, algorithm, and data structure knowledge via tutoring

General Dynamics MS, Software Engineer Intern, 05/16–08/16 | Fairfax, VA

- Reduced app build time by 5 minutes in JavaFX, Maven app via multithreading

Skills

Coding

- Proficient with JavaScript, TypeScript, React, Python, Pandas, PySpark, React Native, AngularJS, Java, Node.js, Express.js, CSS, HTML, Sass/SCSS, StencilJS
- Familiar with C Sharp, Angular, Kusto Query, ASP.NET Core, jQuery

Topics

- Web development, Front-end development, Full-stack development, Integration/Unit testing, Telemetry, Metrics and alerts, Web performance, Data structures, Algorithms, Web components, Progressive Web Apps, REST APIs, Accessibility, Mobile development, Computer graphics, Design

Education

Virginia Tech

- BS, Computer Science
