Experience

Redmond, WA
05/18–08/18

Software Engineer Intern, Microsoft

Optimized and organized iOS and Android file logging via buffering
Integrated API for mobile incident creation and mitigation
Captured network activity and formatted for data analysis
Automated API token authentication setup process via Gulp
Built Java and Objective-C feature-gate files via TypeScript

Durham, NC
05/17–08/17

Software Engineer Intern, Fidelity Investments

Developed web app UI with Angular 2 and unified style in Sass
Managed Node.js development of temporary file alteration service
Implemented RESTful web services and SQL database queries
Tested full-stack of web app with unit and integration tests

Blacksburg, VA
08/16–05/17

Computer Science TA, Virginia Tech

Taught Java software design and data structures to students
Improved coding comprehension by refining curriculum
Supported students in the fundamentals of OOP in Java

Fairfax, VA
05/16–08/16

Software Engineer Intern, General Dynamics MS

Awarded as 1 of 1st 3 interns delivering mission critical product
Reduced scenario build time by 5 minutes in Java/Maven app
Achieved real-time data exchanges via DDS and Derby database
Designed responsive GUI for 2D and 3D dashboards via JavaFX

Charlottesville, VA
07/14–01/15

Software Engineer Intern, University of Virginia

Initiated development of a multi-user JavaScript web app
Improved UX by designing multi-platform interface via CSS
Deployed MySQL database integrated with PHP communications

Projects

Capital One
01/17

Personalized Credit Card Analysis, What's in Your Wallet

1st Place in Capital One Software Engineering Summit
Designed responsive Node.js app with organized Sass styling
Energized UX with animated elements and jQuery events
Streamlined development with modular Pug templating

Capital One
10/16

WebGL Global Data Visualization, Web & Happiness

3rd Place in Capital One Global Data Visualization Challenge
Created procedural Gulp tasks for fluid, comprehensive builds
Made user interactive JSON queries with Google Chart API
Modularized styling via cross-platform SCSS components

Education

Virginia Tech

BS, Computer Science
Expected Graduation: 05/19
In-Major GPA: 3.50/4.00
Dean's List 3 Semesters

Involvement

Hackers at Virginia Tech

Advertising Head | Summer '17–Present
Web Designer | Fall '16–Spring '19

Computer Science Department

Ambassador | Fall '16–Spring '18

Computer Science Mentoring

Mentor | Fall '16–Fall '17

ACM-ICPC Programming Team

Member | Spring '16, Spring '17

CodePath University

Teaching Assistant | Fall '16

Running Club at Virginia Tech

Webmaster | Spring '16–Spring '17

Boy Scouts of America

Eagle Scout | Winter '12–Present

Skills

Coding

Proficient with CSS, HTML, Java, JavaScript, jQuery, Pug, Sass/SCSS, TypeScript
Familiar with AngularJS, C, Node.js, Objective-C, React, React Native, Redux

Tools

Git, Gulp, Integration/Unit Testing, LaTeX, Unix CLI, Vim

Other

Advertisement Design, Android Development, Computer Graphics, iOS Development, User Interfaces, Web Design
